

All children enrolled in DSPAC preschool will have a developmental screening completed by the teachers from the IU6 Early Intervention program. The screening only takes a few minutes for each child and will help determine if any of our children will benefit from Early Intervention services such as Speech or Special Instruction. Even if you feel your child will not need services, the screening is quick and children typically enjoy it. Parents/Guardians will be informed of the results of the screening and any concerns identified if there are any.

Please complete this form so that we can complete this screening and ensure that each child is getting everything they need during this important time in their development.

Thank You!
